🎓 Tue Boesen

Scientific Focus

My main scientific focus areas are currently: machine learning and protein folding. More specifically, within machine learning I have worked extensively with equivariant, graph-based, transfer-learning, and self-supervised learning. The goal of my work in machine learning have always been fundamentally understand why neural networks work, which I believe is best done by connecting neural networks with well-established areas of mathematics. This lead to mimetic neural networks, and constrained neural networks.

Education

Aarhus University

PH.D. IN GEOPHYSICS

- Numerical methods for electromagnetic geophysics beyond 1D

Denmark

2015 - 2018

Aarhus University

M.S. IN THEORETICAL PHYSICS

- Foundation for a parallel time-dependent density functional theory simulator in a spherical harmonic basis using the exact exchange energy functional

Denmark

2010 - 2011

Aarhus University

B.S. IN PHYSICS

- Thesis: Feynmans Pathintegral i 1 Dimension med fokus på sinusbaner

Denmark

2006 - 2010

Experience

Proteic Bioscience Inc.

MACHINE LEARNING CONSULTANT

- Developed and trained equivariant and mimetic neural networks for energy and force predictions for biomolecular systems.
- Developed a parallel framework for Protein design using PyRosetta.

Vancouver, Canada

Jan 2022 - June 2022

University of British Columbia

POSTDOCTORAL RESEARCH FELLOW IN MACHINE LEARNING

- Developed methods for applying constraints in high dimensional space to smoothly constrain/guide a neural network.
- Published mimetic neural networks for protein design and folding.
- Developed self-supervised conditional probability neural networks for protein folding.
- Developed a semi-supervised active learning algorithm.

Vancouver, Canada

May. 2019 - Aug. 2021

Computational Geoscience Inc.

AI RESEARCH SCIENTIST

- Published novel Graph-based semi-supervised learning methods applied to seismic data.

Vancouver, Canada

May. 2019 - Aug. 2020

HydroGeophysics Group at Aarhus University

RESEARCH ASSISTANT

- Open sourced a sparse iterative parallel linear solver based on my research during my Ph.D.
- Open sourced an OpenMP parallelization framework developed during my Ph.D.

Aarhus, Denmark

Aug. 2017 - Apr. 2017

Danske Bank

ANALYST, GRADUATE POSITION

- Worked in customer insight creating forecast models.

Copenhagen, Denmark

Sep. 2013 - Apr. 2014

HydroGeophysics Group at Aarhus University

SCIENTIFIC PROGRAMMING CONSULTANT

- Created SPIA in Pascal, an application for ground-based EM measurements.

Aarhus, Denmark

Mar. 2013 - Sep. 2013

Publications

IN PREPARATION

A-Optimal Active Learning

Tue Boesen, Eldad Haber

arXiv preprint arXiv:2110.09585 (2022). 2022

Constrained Neural Networks

Tue Boesen, Eldad Haber

(2022). 2022

JOURNAL ARTICLES

Mimetic Neural Networks: A Unified Framework for Protein Design and Folding

Moshe Eliasof, Tue Boesen, Eldad Haber, Chen Keasar, Eran Treister

Frontiers in Bioinformatics 2 (2022). 2022

Data-driven semi-supervised clustering for oil prediction

Tue Boesen, Eldad Haber, G Michael Hoversten

Computers & Geosciences 148 (2021) p. 104684. Pergamon, 2021

An efficient 2D inversion scheme for airborne frequency-domain data

Tue Boesen, Esben Auken, Anders Vest Christiansen, Gianluca Fiandaca, Casper Kirkegaard, Andreas Aspö Pfaffhuber, Malte Vöge

Geophysics 83.4 (2018) E189–E201. Society of Exploration Geophysicists and American Association of Petroleum ..., 2018

A parallel computing thin-sheet inversion algorithm for airborne time-domain data utilising a variable overburden

Tue Boesen, Esben Auken, Anders Vest Christiansen, Gianluca Fiandaca, Cyril Schamper

Geophysical Prospecting 66.7 (2018) pp. 1402–1414. European Association of Geoscientists & Engineers, 2018

A review of airborne electromagnetic methods with focus on geotechnical and hydrological applications from 2007 to 2017

Esben Auken, Tue Boesen, Anders V Christiansen

Advances in geophysics 58 (2017) pp. 47–93. Elsevier, 2017

CONFERENCE PROCEEDINGS

semi-supervised clustering for oil prospectivity

Tue Boesen, Eldad Haber, G Michael Hoversten

ICLR AI for Earth Sciences workshop, 2020

Efficient 2D Hybrid Inversion of Airborne Frequency Domain Data

E Auken, T Boesen, AV Christiansen, GF Fiandaca, AA Pfaffhuber, MV Vöge

Second European Airborne Electromagnetics Conference, 2017

2D FEM Inversion With A Moving Footprint And A hybrid 1D And 2D Forward And Derivative Implementation

Tue Boesen, Esben Auken, Malte Vöge, Casper Kirkegaard, Kristoffer Rønne Andersen, Andreas Aspö Pfaffhuber, Anders Vest Christiansen

AGU Fall Meeting Abstracts, 2016

Rapid Inversion of Large Airborne AEM Data Datasets Utilizing Massively Parallel Co-processors

C Kirkegaard, K Andersen, AV Christiansen, E Auken, T Boesen

First European Airborne Electromagnetics Conference, 2015

Utilizing massively parallel co-processors in the AarhusInv 1D forward and inverse AEM modelling code

Casper Kirkegaard, Kristoffer Andersen, Tue Boesen, Anders V Christiansen, Esben Auken, Gianluca Fiandaca

ASEG Extended Abstracts 2015.1 (2015) pp. 1–3. CSIRO PUBLISHING, 2015

2.5 D inversion of sea ice thickness from helicopter EM data

M Vöge, A Pfaffhuber, E Auken, C Kirkegaard, T Boesen, S Hendricks, P Hunkeler

First European Airborne Electromagnetics Conference, 2015

Skills

Platforms Windows, Linux Ubuntu, AWS

Programming Python, Pytorch, LaTeX, Git, Matlab, Fortran, Julia, Delphi/Pascal, OpenMp, MPI

Languages Danish, English

Teaching and supervision

Teaching

INSTRUCTOR

- Calculus.
- Electric and Electromagnetic methods.
- Data processing and interpretation for groundwater mapping.
- Geophysical methods.
- Hydrogeophysical field course (twice).

Aarhus University, Denmark

2009-2017

Supervision

CO-SUPERVISOR

- Jingrong Lin - Ph.D. student in geophysics.

UBC, Canada

2020
